

Abu Sayeed

Front-End-Developer

Mobile: +880 1874325678

Address: Chittagong, Bangladesh

Email: abu.sayeed1352@gmail.com || [Linkedin](#) || [GitHub](#)

OBJECTIVE :

My job is to build your website so that it is functional and user-friendly but at the same time attractive. I am eager to expand my skills and explore new technologies to bring innovative ideas to life. I have a strong passion for the creativity and discipline that goes into front-end development. My focus is on clean code, attention to detail.

SKILLS:

- **Expertise:** HTML | CSS | React | React router | Tailwind | Bootstrap | Firebase Authentication | JWT
- **Comfortable:** JavaScript | ES6 | MongoDB | Express.js | Rest APIs
- **Familiar:** Node.js
- **Tools:** GIT | VS Code | Figma | GitHub | Netlify | Vercel

EXTRA SKILLS :

- **Interpersonal Skill:** Experienced in learning new technology quickly
- **Other skills:** Wordpress, Photoshop, MS PowerPoint, MS Word

PROJECTS :

- **Music School** [Live Site](#) | [GitHub](#) > [Client](#) | [Server](#)

Music School is a full stack web-application with an admin, instructor, and student dashboard

- Users can create an account and log in to access learning materials
- Admin can easily edit user roles from the dashboard
- Instructors can add, update, and delete classes. And admin can deny these classes.
- Authentication, Responsive, Private Route, Payment.

Technologies: React | React router | Tailwind | Firebase | Express.js | Mongo DB | JWT | Vercel | React query | Axios interceptors | Stripe Payment

- **Toy Emporium** [Live Site](#) | [GitHub](#) > [Client](#) | [Server](#)

Toy Emporium is a full stack react application with authentication and database integration

- Toy Emporium is a full-stack application. Here users will find a lot of features. Users can create accounts with their email and password or with Google.
- Users will find a fancy gallery section, a products section, and some other cool sections. In the product section users can find categorized products.
- On the 'Add Product' page users can add new products to the database. They can also edit and delete their own products on the 'My Products' page.

Technologies: React | React router | Tailwind | Firebase | Express.js | Mongo DB | JWT | Vercel

- **Food and Taste Recipe** [Live Site](#) | [GitHub](#) > [Client](#) | [Server](#)

Recipe is a react single page application with Firebase authentication

- In this project, there are two routes - Home and Blog - with a shared header and footer containing navigation links.
- There is a banner section, a numeric info section, a chef section featuring famous Bangladesh chefs, and a 'View Recipe' button. displaying a banner with their short bio.
- There is also a recipe favorites section, a blog with question-answers.
